

MA(2): posterior on θ_1 over iterations (black = exact posterior; dashed = true value 0.6)

Method ■ ABC-SMC ■ RE-ABC-SMC²

MA(2): posterior on θ_2 over iterations (black = exact posterior; dashed = true value 0.2)

Method ■ ABC-SMC ■ RE-ABC-SMC²

Joint posterior at the final tolerance (eps = 1) vs exact

black contours = exact posterior; x = true theta

Method ● ABC-SMC ● RE-ABC-SMC^2
